EDUCATION

Brigham Young University - Idaho

August 2023 - December 2024

Bachelor of Science; Computer Science

GPA: 3.88 / 4.00

- Created WriteAway, a journaling app written in React Ionic and utilizing Microsoft Azure
- Implemented BYU Weather, a web application to compare historical forecast and historical weather across all three BYU campuses

EXPERIENCE

Individual Contractor - Remote - Full Stack Developer

May 2025 -

- Migrated the WISE Earn to Learn portal, including the codebase and user data in only three months from a no-code platform to a React frontend supported by Amazon AWS
- Solo developed within the WISE portal scholarship and organizational budgeting features which track tens of thousands of dollars between four different organizations
- Integrated external APIs into the WISE platform via AWS Lambda, including services from Human E Sources, McCoy Universe, Talent LMS, College Score Card, and Google Maps

AlVector - Provo, UT - Software Engineer

Feb 2025 - May 2025

- Began work on WISE, beginning by fixing a Challenge of the Week functionality designed to dynamically select among thousands challenges for participants

Idaho National Laboratory (INL) - Idaho Falls, ID - Software Engineer

May 2024 - Feb 2025

- Developed Cirrus, a web application project funded by the Grid Deployment Office designed to facilitate dozens of energy grid organizations to understand the benefits of cloud migration
- Designed and coded a detailed consequence matrix for communicating probability and severity of cloud migration hazards through a visual representation
- Implemented full interaction between a React front-end and PostgreSQL database, ensuring users' dozens of assessment responses would be saved

Brigham Young University - Rexburg, ID - Teaching Assistant

Jan 2024 - Apr 2024

- Developed a journaling mobile application in React Ionic, showcasing strong problem-solving skills and driven self-motivation
- Facilitated the creation of a future class curriculum for hundreds of students
- Documented development process, adding an exhaustive report of the pros, cons, and unique attributes of React Ionic

Brigham Young University - Provo, UT - Full Stack Developer; Provo, Utah

Apr 2022 - May 2023

- Influenced to the development of services for the BYU Honors Program, including streamlining the application and thesis processes for hundreds of students`
- Migrated major resources successfully from legacy systems to modern services, replacing decades old software with modern solutions impacting thousands of students
- Utilized AWS products including EC2, Lambda, and Fargate

ADDITIONAL INFORMATION

- Proficient in Javascript, Typescript, React, AWS
- Experience in React Native, React Ionic, Android Studio, and Unity
- Experience with Microsoft Azure Cosmos DB
- Semi-professional level jazz drummer and amateur rock climber
- Eligible to work in the U.S. with no restrictions
